

Best Fireproof Structure Board

- Fully replaces flammable OSB and plywood, suitable for shear walls, roof decks, floor systems, walkable roofs, and fire-rated partitions in key structural applications.
- Earthquake-resistant, fire-resistant, and moisture-resistant streamlining construction while reducing overall insurance costs.

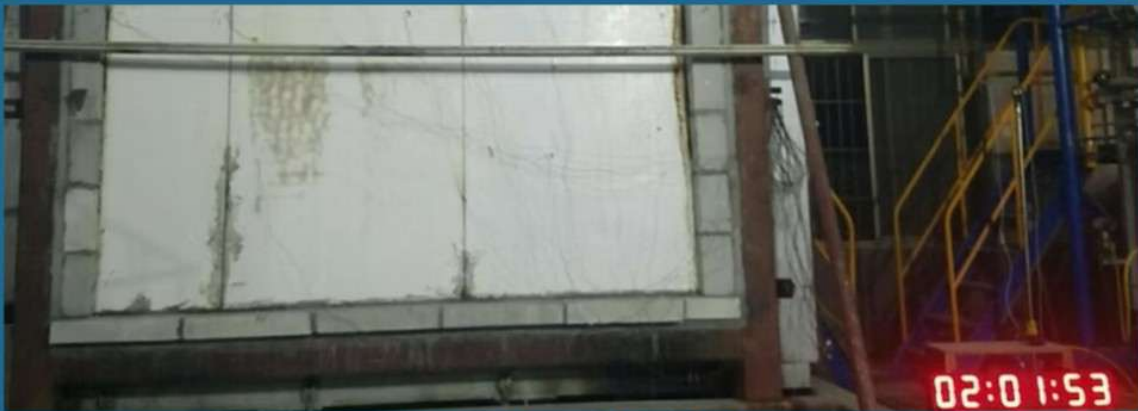

-Tested to ASTM D1037, with screw withdrawal strength of 1113 lbf, head pull-through strength reaches 855 lbf, and lateral shear strength of 482 lbs

-Structural performance is nearly twice that of standard OSB, making it a full replacement for shear walls, roofing, and flooring systems.

-Exceeds Class A fire rating, suitable for fire-rated walls and structural fire-resistant assemblies.

2 Hour fire-resistant test

Screw lateral resistance test

Direct screw withdrawal test

High-efficiency production line
